

Procedure for getting the PIE CD Programs to run in Windows Vista, 7 and 8.

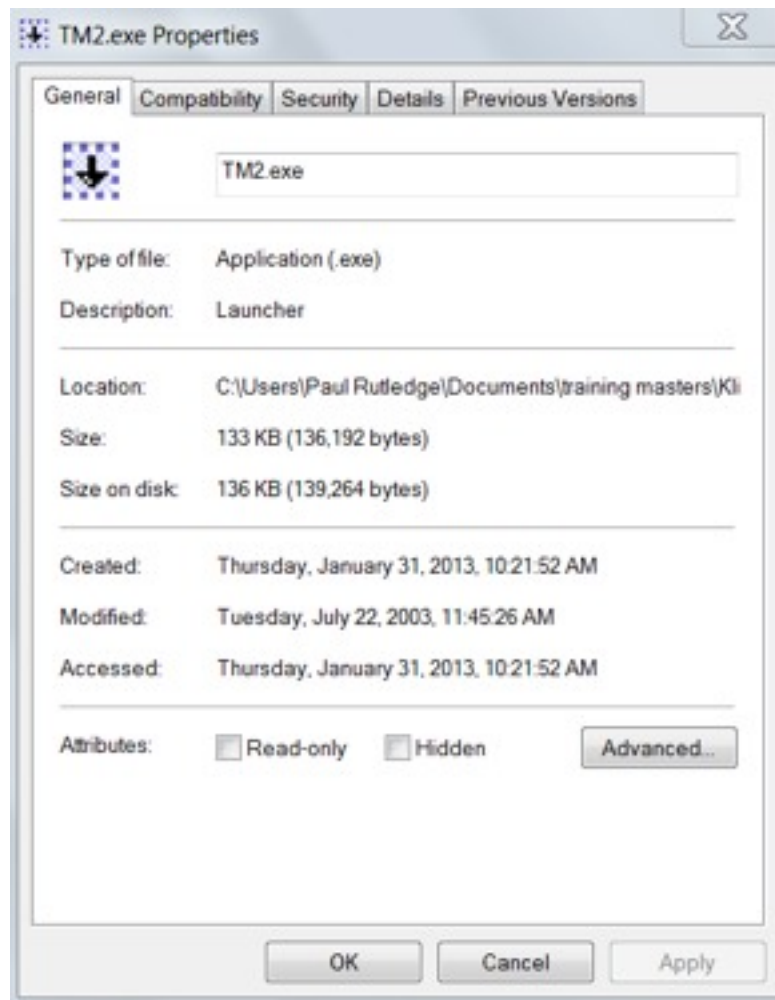

STEP #1 Download and install the latest version of Quick Time (create a click link)

<http://www.apple.com/quicktime/download/>

STEP #2 Copy the CD content to your hard drive.

STEP #3 Open the folder on your hard drive containing the CD files.

STEP #4 Right click on the program's .exe file and select "properties."
This window will open.

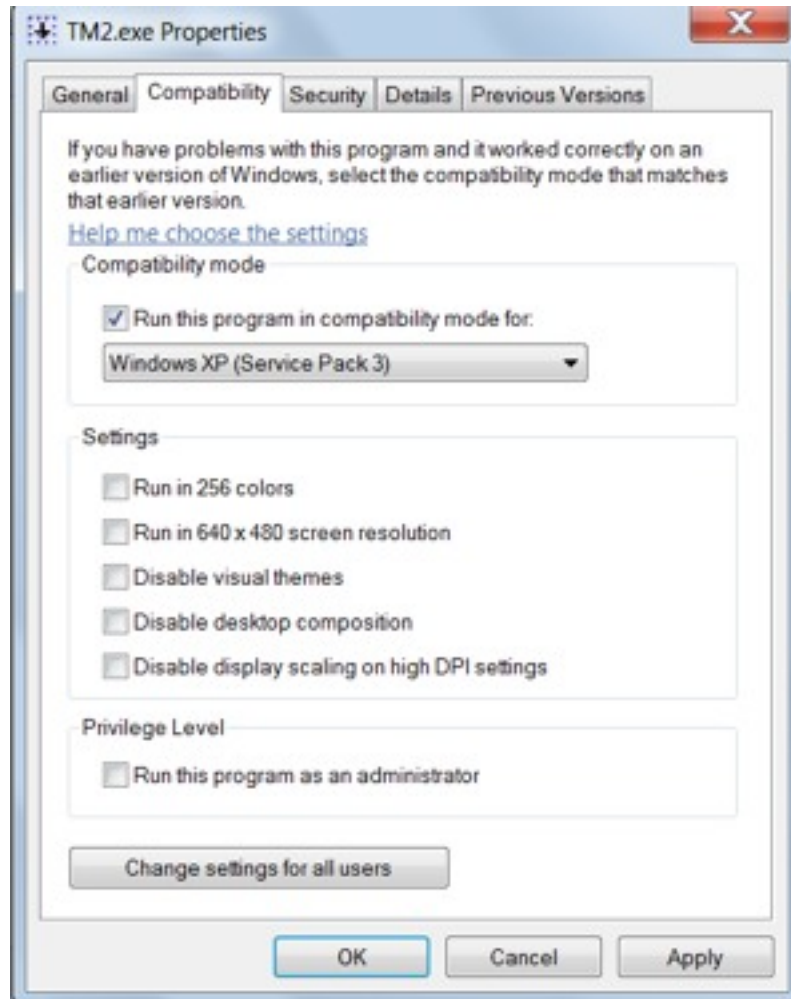

STEP #5 Select the "compatibility" tab.

STEP #6
mode for:”

Click the checkbox next to “Run this program in compatibility

In the dropdown box below, select the latest option for “Windows XP,”
regardless of the version of Windows that you are using.

Click “Apply” and “OK.”

The window should close taking you back to the original file folder with the CD content.

Run the .exe program and you're good to go!
